I am a research scientist with expertise in agronomy, plant breeding, statistical genetics, machine learning, phenomics and genomics. I work with the design, execution, and analysis of experimental and observational studies. I have four years of industry experience as quantitative geneticist complemented by adjunct faculty position at Purdue University. I like working in collaborative environments that encourage teamwork, and I value accountability and transparency with stakeholders.

EXPERIENCE

- 2016 - Current: **Research Scientist**, Biostatistics group at Corteva Agrisciences.
- 2017 - Current: **Adjunct Faculty**, Department of Agronomy, Purdue University.
- 2013 - 2016: **RA Population Genetics**, Purdue University. Supv. by William Muir (bmuir@purdue.edu).
- 2013 - 2016: **RA Soybean Breeding**, Purdue University. Supv. by Katy Rainey (krailey@purdue.edu).
- 2010 - 2011: **RA Potato Breeding**, UFSM, Brazil. Supv. by Dilson Bisognin (dilsonb@smail.ufsm.br).
- 2009 - 2011: **RA Soil Physics**, UFSM, Brazil. Supv. by Jose Miguel Reichert (reichert.jm@gmail.com).

ACADEMICS

1. Academic Background

- *Technical degree in agriculture and livestock* (2004-2006). E.E.T. Celeste Gobbato, RS, Brazil.
- *B.Sc. Agronomic Engineering* (2007-2011). Federal University of Santa Maria, RS, Brazil.
- *Ph.D. Soybean Breeding and Statistical Genetics* (2013-2016). Purdue University, IN, USA. *GPA 4.*

2. Awards and Recognitions

- *Summer Institute of Statistical Genetics (SISG) Scholarship*, University of Washington. 2016.
- *John Axtell Graduate Student Award in Plant Breeding and Genetics*, Purdue University. 2016.
- *ICQG5 Fellowship*. Support for graduate students in plant breeding. Sponsored by USDA. 2016.
- *Dow AgroSciences Graduate Scholarship*. Integrity, academic excellence, initiative and leadership, 2016.
- *Outstanding Graduate Research Award (PhD)*. Purdue 2015 Graduate Student Award.
- *Summer Institute in Statistics for Big Data (SISBID) Scholarship*, University of Washington. 2015.
- *AG Spotlight - Graduate AG Research Spotlight*. College of Agriculture, Purdue University. Feb 2015.
- *Bauman-Doolittle Endowment* - Support for graduate students in breeding and genetics. 2015.
- *Loyal F. Pete Bauman Memorial Fund* - Support for graduate students in breeding and genetics. 2014.
- *Wyman E. Nyquist Scholarship* - Quantitative Genetics. Purdue 2014 Graduate Student Award.
- *Soy2014 Student Award* - MCBS: 15th Biennial Conference. University of Minnesota, 2014.
- *Summer Institute of Statistical Genetics (SISG) Scholarship*, University of Washington. 2013.

3. Areas of Expertise

- Plant genetics and breeding, field breeding techniques and selection theory;
- Phenomics and high-throughput technologies in plant breeding;
- Mixed models, multivariate models, machine learning and Bayesian methods;
- Spatial statistics, adjustment of field variation and imputation methods;
- QTL mapping, Genome-wide association mapping, genome-wide prediction methods;
- Computational breeding, algorithm development and high-performance computing;

4. Editor

- *Scientia Agricola* (2019)

5. Reviewer

- *African Journal of Agricultural Research* (2016), *BMC Genomics* (2016), *Crop Science* (2016), *Euphytica* (2018), *Evolutionary Bioinformatics* (2018), *Field Crop Research* (2018), *Genes* (2019), *Genetics* (2016), *G3* (2016), *Heredity* (2019), *iMedPub* (2016), *International Journal of Molecular Sciences* (2019), *Journal of Animal Breeding and Genetics* (2018), *Plants* (2019), *PLOS Computational Biology* (2018), *The Crop Journal* (2018), *Theoretical and Applied Genetics* (2019).

6. Patents

- Rainey, et al. (2018). Method of using genetic architecture of phenomic-enabled canopy coverage in glycine max. [LINK](#)
- 7. Grants**
 - Rainey, et al. (2020). Application of UAS biomass longitudinal phenotypes to selection in soybean breeding trials. National Institute of Food and Agriculture, USDA.
 - 8. Complementary Background**
 - Mixed Models in Quantitative Genetics (2013). *SISG*. University of Washington.
 - Markov chain Monte Carlo applied to Genetic Analysis (2013). *SISG*. University of Washington.
 - Supervised Methods for Statistical Machine Learning (2015). *SISG*. University of Washington.
 - Unsupervised Methods for Statistical Machine Learning (2015). *SISG*. University of Washington.
 - Population Genetic Data Analysis (2016). *SISG*. University of Washington.
 - Association Mapping: GWAS and Sequencing Data (2016). *SISG*. University of Washington.
 - 9. Computational**
 - Advanced R programming and related tools (Markdown, Shiny, Rcpp).
 - Background on C++, parallel computing, commercial analytical libraries (Eigen, SAS, ASReml, BLUPF90).
 - Familiarity with machine learning computation and libraries (AWS, Docker, Keras, h2o, XGBoost).
 - Basic coding in Python, Shell, SQL, Perl/regex and LaTeX.
